# Why DO I NEED A MONITORED ALARM SYSTEM?

Professional Back-to-Base Central Station Monitoring is an integrated part of the Watchguard Digital™ Security System. Most major insurers offer significant discounts off their home and contents policies when you have a monitored alarm installed.

Monitoring dramatically increases your level of protection. If your alarm activates, you simply can't rely upon neighbours to call the police or to attend your premises. You need a third party who will notify you, security patrol, police, fire, or medical services when an emergency arises. Only professional monitoring can provide this service.

**In fact, according to figures from AAMI insurance, over 96% of burglaries occur in homes without a monitored alarm system!** Furthermore, their figures indicate that 1 in 10 Australians have experienced a home invasion - where a thief has broken in while they were at home. Finally, almost half of Australians do not investigate or call the police when they hear a home alarm - reinforcing the need for a monitored system.

- 1 x Phone Lead to connect the Dialer to your phone line
- 1 x 12VDC Power Supply to power the outdoor siren

\* Special Offer based on a 6 month monitoring contract, see back page for details

# How THE SYSTEM WORKS:

The Watchguard™ Digital Wireless Alarm System is a true revolution in monitored alarm systems. Utilising advanced wireless technology means installation is very simple and also allows you to expand / relocate the system at anytime.

To install, simply mount the Wireless Movement Sensors in a suitable position and install the outside siren, connect the Communication Dialer plug-pack to a power-point, plug the phone lead into a phone socket and then register with our Alarm Monitoring Centre.

1 Use your Remote Control or Wireless Keypad to arm your Watchguard™ Wireless Alarm System.

2 When movement is detected in your premises, it automatically sends your alarm activation data to our monitoring centre via your phone line. The in-built siren will also sound to repel the intruder.

3 Our alarm monitoring centre will receive the data from your system and your designated contacts will be notified as per your instructions.

## YOU CAN RECEIVE ALARM NOTIFICATIONS BY:

Email

SMS

Phone

### Example of alarm message:

"Hello John. This is Sally from the Monitoring Centre. Your Alarm System at 203 Smith Street Sydney has been activated by Zone 1 - Lounge Room."
