DOES YOUR SURVEILLANCE SYSTEM HAVE INTELLIGENT VIDEO ANALYTIC FUNCTIONS?

Email Alerts on System Events

Watch on your Smartphone

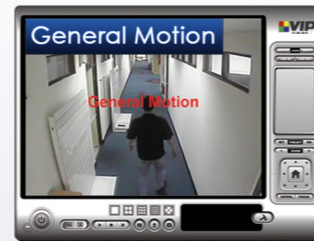

Web-Based Remote Live View

Powerful Playback Functionality

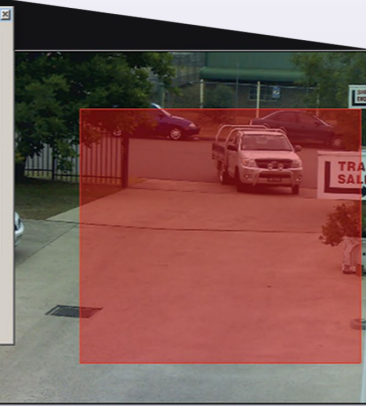

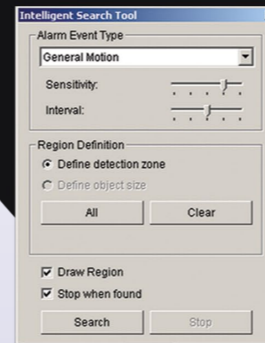

The powerful NVR software enables fast and versatile playback of recorded footage. Playback featured include:

- Open by time, graphic record or event log.
- Video enhancement for image fine-tuning.
- Multi-channel playback.
- Supports digital watermark on exports.
- Searchable point of sale transactions.
- Auto backup to FTP.

Five Intelligent Search Functions

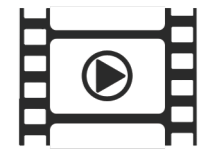

Search recorded footage faster and smarter with five intelligent search parameters. Easily find out when events occur by highlighting an area of interest directly onto the camera image (shown below).

The same intelligent functions can be applied to **people & object counting**. Simply select high traffic areas and the VIP Vision NVR will count how many people have passed in and out. This data is recorded along with surveillance footage and can be viewed as a graph or exported as CSV data.
