The Truth is in the Detail

The 1.3 megapixel cameras bundled with the NVRPRO range have a maximum recording resolution of 1280 x 960. When compared to traditional analogue recording resolutions, this is three times greater than D1 (704 x 576) and twelve times greater than CIF (352 x 288). The resolving power of the NVRPRO range allows for greater surveillance area coverage, providing larger images and preserving finer details.
